

**Kimplas Make “Trustlene Brand” Multi  
alignment Clamp - For Pipe Size 20 - 32 MM.**

**Overview :**

- This tool has been designed to restrain, align and reround pipe, before and during the electrofusion process
- It works with pipes between 20mm and 32mm diameter
- The tool has been designed to work in confined spaces and can be used in very narrow trenches
- The tool is specifically designed to hold fittings on to tapping saddle outlets
- Quick-grip clamps allow the tool to be quickly and easily fixed to, and removed from, the pipe
- Different diameter shells can be fitted to each ring to allow reducers to be clamped

**Features :**

- The tool has a rigid design allowing coiled pipe to be aligned before the weld takes place
- Quick mole-grip type clamps allow the tool to be easily fixed and locked onto the pipe allowing very quick operation
- Magnetic liner shells quickly clip in and out the the clamp rings allowing different diameter pipes and reducers to be clamped
- The tool can be used to clamp fittings before welding, or as a stand-alone rerounding tool for taking ovality out of pipes
- Different diameter liner shells can be used, for example imperial sizes

**Specifications :**

- Shells are available in the following sizes:  
20 (tool ring is 32mm, 3/4 inch)
- The clamp is made from zinc plated steel.
- Size 26 cm x 13 cm x 7 cm
- Weight 1.5 kg
